Customer User is the end user and also who is the user of their respective assets.

1. Can able to view asset general details, mapped Assets, access for support documents, specifications.
2. Can raise and track breakdown tickets.
3. Can able to attend only ppm tasks (managed by customer's schedule) and not breakdown tickets.
4. Can able to view the preventive / breakdown / AMC / service requests.
5. Provide feedback and ratings.
6. Receive notification for ticket/ppm tasks progress.

## STEPS TO START WITH INNOMAIN

The following are the hierarchy steps needs to be followed to start working in Innomaint.

1. User role creation
2. User creation
3. Spare parts categorization creation
4. Spare parts creation
5. Asset creation
6. Customer creation
7. Schedule creation
8. Schedule Initiation
9. Assign / Reassign schedule
10. Accept / Reject schedule
11. Raise breakdown ticket
12. Assign / Reassign breakdown tickets

13. Accept / Reject breakdown tickets
14. Report generation

## STEP 1: USER ROLE CREATION

1. In the left side menu bar click on 'User Role' in setup menu.

2. You will be directed to 'User Role' page where you will find the predefined system user role and its privileges. Check out the below screen.

- Click on the  button available in the action column to view the privileges of user role  
(Check out the below screen shot).

View Roles & Permissions:

Role Name: Super Admin

| Menu              | Add                                 | View                                | Edit                                | Delete                              |

Cancel Submit

- New user role can be created by inheriting predefined role and can customize the permissions (if needed).

## STEP 2: USER CREATION

- In the left side menu bar click on 'Users' in setup menu.

2. You will be directed to 'Users' page as shown below.

3. Click on  button to create a new user. The below screen appears:

4. Provide first name, last name, email address, contact number, role which are mandatory.

5. Predefined roles will be listed in 'Role' drop-down.

6. Privileges will be provided to the user based on the selected role, where each and every role has various privileges.
7. The user will be created once the submit button is clicked and the respective user will receive email notification for activation.
8. Once activation is done, user can login to the application using their email address and password.
9. Assets can be mapped to the customer after the user creation.

### STEP 3: SPARE CATEGORIZATION

1. Click on 'Asset Setup' in the left side menu bar, to create spare category & sub-category.

2. Click on spare category tab and you will find  button. Click on it will allow to create spare category.
3. Click on spare sub-category tab and you will find  button. Click on it will allow to create spare sub-category.
4. Created spare parts category and spare parts sub-category will be available in spare parts stock page.

## STEP 4: SPARE PARTS CREATION

1. Click on 'Spare Parts Stock' in 'Stock Management' in the left side menu bar, where you will be directed to 'Spare Parts Stock' screen to create spare parts.

2. Click on 'Add Spare Parts' button to create new spare parts.

3. The below screen appears on click of 'Add spare parts' button. Provide all the data that are marked as mandatory \*.

- Click on **Submit** button will create new spare part.

## STEP 5: ASSET CREATION

- You can create manufacturer, category and sub-category prior to asset creation through 'Asset Setup' screen.

- Click on 'Asset Maintenance' in the left side menu bar, to create new asset.

3. Click on **Add Asset** button to create new asset.

4. Provide the asset details which are marked as \*.

1. Click on save will create the given asset details and request to provide the following additional details:
  - i. Spare Parts - You can add spare parts related to asset model.
  - ii. Documents - You can upload asset documents like user guide, trouble shooting.
  - iii. Solution Bank - You can provide solution details of a defects related to asset.
  - iv. Additional Info - You can define additional information required for the asset.

- v. Asset Id - The following details can be defined in asset id tab: Asset Id, Asset Number, QR Code, Year of manufacturing, Capacity Rating, Installation Date, Criticality, Customer Name, Area Name.

## STEP 6: CUSTOMER CREATION

1. In the left side menu bar click 'Customer' in setup menu.

2. A pop-up will be opened on click of  button to create a new customer.

5. Customer asset mapping and customer user mapping can be done using the icons shown below.

## STEP 7: SCHEDULE CREATION

1. In the left side menu bar click '**Asset Maintenance**'.
2. Schedules can be created for an asset's model, which will be applicable for its all Asset Ids.

Page 15

- Schedule can also be created for an individual asset id. Go to 'Asset Maintenance >> Add/Edit Asset Maintenance >> Asset Id'. The below screen appears and using  icon we can create schedule for individual asset id.

- Schedule can be created based on frequency or occurrences or end by date.
- Schedule can be prioritized and task can be added to it using  button. Check out the below screen shot.

- Created schedules will be listed in 'Schedule' page, which can be navigated through  icon available in asset maintenance page and Asset Id tab.

## STEP 8: SCHEDULE INITIATION

- Click on  icon available in Asset Maintenance page where you will find the asset id lists.
- Click on  icon to initiate the schedule configured for each asset.
- Schedule can be initiated by providing date and time. Check out the below screen shot.

## STEP 9: ASSIGN / REASSIGN SCHEDULE

- In the left side menu bar click 'Preventive' in 'Work Order' menu.

- Initiated schedules will be listed in 'New' and 'Upcoming' tabs.

3. Work in progress schedules and completed schedules will be listed in 'In-progress' and 'Closed' tabs respectively.

4. New and upcoming schedules can be assign/reassign to engineers using  icon. Check out the below screen shot.

## STEP 10: ACCEPT / REJECT PPM TASKS

1. Service technician should accept the assigned PPM tasks through mobile app.
2. Download Innomaint mobile app from play-store.
3. Login as service technician. Below screen appears.

- Click on ppm task which is listed in 'Schedule' page as shown in the above screen. It will direct to details page where the technician can accept or reject the ppm task as shown below.

## STEP 11: RAISE BREAKDOWN TICKETS

- Download Innomaint mobile app from play-store.
- Login as customer and click on 'Tickets' tab where the existing created tickets will be listed.
- To create a ticket click on  button and the below screen appears:

## STEP 12: ASSIGN / REASSIGN BREAKDOWN TICKETS

1. In the left side menu bar click 'Breakdown' in 'Work Order' menu.

2. Tickets raised by user through mobile app will be listed in 'New' tab.
3. Work in progress and completed tickets will be listed in 'In-progress' and 'Closed' tabs respectively.

5. New tickets can be assign/reassign to engineers using  icon. Check out the below screen shot.

## STEP 13: ACCEPT / REJECT BREAKDOWN TICKETS

1. Service technician should accept the assigned breakdown tickets through mobile app.
2. Download Innomaint mobile app from play-store.
3. Login as service technician. Below screen appears.

4. Click on breakdown task which is listed in 'Ticket' page as shown in the above screen. It will direct to details page where the technician can accept or reject the assigned ticket as shown below.

## STEP 14: BULK UPLOAD

1. Bulk upload can be done for the following, through the template available in respective screens:

- a) Customers
- b) Users
- c) Assets
- d) Schedules
- e) Spare Parts

## STEP 15: REPORTS

- In the left side menu bar click 'Reports'.

## 1. TRANSACTION REPORT

## 2. MONITORING POINT REPORT

| S.No | Asset Name | Asset Model   | Asset ID | Monitoring Point Name | UOM       | Meter Reading Date |
|------|------------|---------------|----------|-----------------------|-----------|--------------------|
